

PAC Lock

Electronic Cabinet Lock

PAC Lock: Cabinet Lock

PAC Lock Cabinet Locks provide a streamlined solution for securing internal cupboards and cabinets. Fully integrated with Access Central™ software, they extend access control to storage areas without the need for cabling or server infrastructure. The wire-free, modular design enables rapid installation and straightforward maintenance, making them suitable for environments where traditional wired solutions are impractical.

Built for durability and low power consumption, PAC Lock Cabinet Locks support standardised, credential-based access within the wider PAC security ecosystem.

- No central server or wiring required.
- Supports PAC OPS™.
- Passive transponder authentication.
- Audible warning of low battery status.

Part Number(s)	PLPCABLOCK: PAC Lock Cabinet Lock
Credential Formats	PAC OPS™
Audio / Visual Indicators	Audible sounder and LEDs
RFID Frequency	13.56MHz
Maximum read range	0-10 mm
Recommended cabling	N/A
Power requirement	1 × CR2 Lithium 3V, (ER 14505m) with expected lifetime up to 180,000 operations PLCYLB02 (pack of 20) - must be purchased via COMELIT-PAC to prevent warranty invalidation.
Dimensions	148.5 (h) × 44.7 (w) × 35.0 (d) mm
Weight	0.65 kg
Material	ABS
Operating Temperature	+5°C to +55°C
Storage Temperature	-40 °C to +65°C
Environment	Indoor
Warranty	24 months
Standards & Compliance	2014/53/EU 
Country of Origin	Germany
