

PAC Lock: Updater

The PAC Lock Updater is a high-frequency administration reader that enables PAC OPS™ (DESFire EV3C) credentials to be used with PAC Lock devices. The Updater supports the assignment of PAC OPS™ HF credentials to cardholders within the access control system and provides rapid encoding for PAC Lock device authentication. The Updater performs credential updates and validation to ensure compatibility and secure operation across all supported devices.

- Simple plug and play connection to Access Central™
- Supports PAC OPS™ with DESFire MIFARE® EV3C
- Rapid administration of credentials
- Clear visual LED display

Part Number(s)	PLUPDR: PAC Lock Updater
Credential Formats	PAC OPS™ with DESFire MIFARE® EV3C
Visual Indicators	RGB LEDs
RFID Frequency	13.56MHz
Maximum read range	Best performance when card is in contact with Updater proximity reader.
Recommended cabling	USB-C to USB-A cable supplied
Power requirement	USB-C
Dimensions	115 (h) × 65 (w) × 15 (d) mm
Weight	0.09 kg (with USB cable)
Material	ABS plastics
Warranty	24 months
Standards & Compliance	
Country of Origin	Romania
