COMELIT PAC®

ONE DOOR ACCESS CONTROL EXPANSION KIT

Each PAC 511 DCi Expansion Kit enables an additional door to be managed as part of the same Access Central™ IP network, when used with the 511DCiSKIT. This provides an easy-to-install solution for extending secure access control management with our highly popular 1-Door Controller kits.

The PAC 511 DCi Expansion Kit (P/N 511DCiEKIT) contains:

1x PAC 511 DCi in metal enclosure with 3A PSU

1x GS3 Mullion HF reader

Download Access Central™ by scanning the QR code overleaf.

ONE TOUCH MODE:

REVOLUTIONISING PAC CONTROLLER TESTING FOR UNPARALLELED CONVENIENCE AND EFFICIENCY.

Designed to streamline the testing process for our PAC controllers and their connected hardware, One-Touch™ mode empowers engineers to conduct comprehensive tests locally, right from installation. Even before the PAC access controller is fully commissioned, our innovative feature ensures seamless functionality checks, eliminating downtime and costly delays. Plus, it's not just for installation – One-Touch™ mode remains invaluable for ongoing maintenance and troubleshooting tasks, delivering unparalleled convenience and efficiency in safeguarding the optimal performance of PAC systems.

UNLOCK THE POWER OF STREAMLINED TESTING WITH ONE-TOUCH™ MODE – BECAUSE EVERY MOMENT COUNTS.
